

Since its establishment in August 2009, the Energy Technology Consortium of Asturias, EIG works with the aim of developing innovative projects of interest to the Asturias energy sector and involving more companies and organizations to participate in its development.

Administered by the Asturias Energy Foundation (FAEN), the Energy Technology Consortium of Asturias, EIG, was founded in 2009.

The enrollment of the Energy Technology Consortium of Asturias, EIG, in July 2010 in the Special Register of Innovative Business Groups of the Ministry of Industry, Mines and Energy of Spain after having recognized its Strategic Plan as Excellent, gives to it a significant value. All companies and entities comprising the Consortium may benefit in the development of innovative projects which intend to carry out.

The Energy Technology Consortium of Asturias, EIG, according to its general guidelines, continues growing and looking for new goals and new projects.

The creation and growth of the Energy Technology Consortium of Asturias, EIG has been possible thanks to the collaboration of the Economic Development Institute of Asturias (IDEPA).

Energy Technology Consortium of Asturias, EIG

Registered under nº REAEI-00124 at the Ministry of Industry, Tourism and Commerce's Special Register of Innovative Business Groupings

**Asturian companies
and organizations
linked by innovation for
the development of the
energy sector**

Companies and entities from Asturias linked by innovation for the development of the energy sector

Mission: To introduce a territorial structure supporting the business logic of the companies with higher activity in the value chain associated to the energy sector.

Vision as national reference: Modernization of the energy sector and its adaption to global challenges related to climate change.

Vision as regional reference: Reference of innovation on the energy field in both energy cooperation and/or individually.

Strategic objectives

- #Promote the group through awareness raising and information.
- #Generate business from cooperation.
- #Generate competitive advantages.

Work lines

- #Area of generation, distribution and consumption of energy.
- #Area of renewable.
- #Area of building energy efficiency.
- #Smart cities, sustainable mobility, fuels, etc.

How to become a member of the Consortium?

Engage in technological development and innovation. **Being a company or entity located in Asturias** whose activity is related to the energy sector.

The Asturias Energy Foundation (Fundación Asturiana de la Energía, **FAEN**), in his capacity as Administrator of the Consortium **selects companies** and organizations and propose them as candidates to be part of it. Consortium partners will decide the incorporation of each candidate.

Consortium **membership** is voluntary and members can leave it all times.

Joining the Consortium as a partner does not represent any payment from companies interested because there is an absence of access or stay fees. As a condition for remaining in the Consortium, the partners have the commitment to present, individually or jointly, technological or innovation project proposals related to their activities.

Advantages of belonging to the Consortium

- #Confidentiality and total reserves of the initiatives and innovation projects that arise.
- #Technical advice on energy issues.
- #Search for partners to develop projects.
- #Legal advice.
- #Search for grants and funds.
- #Preferences in call for grants on issues related to innovation.
- #Participation in specific groups of internationalization.
